

SV3-20

The Super Vac Power Pro SV3 Ventilation Saw is a high power, reliable chain saw made for venting and rescue operations. The SV3-20 features a 20” bar and is powered by a 5.7 horsepower Dolmar engine. This 78.5 cc engine features the new SLR function that lowers emissions for a cleaner environment. The SV3 also features a three-stage heavy-duty air filter that is proven during the smoky conditions a fire fighter will be working in.

The full wrap handle and .404 heavy-duty carbide chisel chain makes this saw quick through the cut. It’s easy to handle and tough enough to tackle a variety of operations, including cutting through residential roofing, removing downed trees, and ripping through various building materials.

Super Vac is dedicated to making this a true fire / rescue saw. A D-ring handle makes it easy to start while wearing multi-layered rescue gloves. A srench tool and holder on the saw makes for quick adjustments and the front faceplate deflects debris. A quick start compression release and an “always on” ignition ensure the SV3 is ready to go when you are.

Specs
